Difference in
Population Density
between 2000 and 1990
300 - 200 (%)
200 - 170 (%)
170 - 130 (%)
130 - 105 (%)
105 - 95 (%)
95 - 80 (%)
80 - 70 (%)
This map illustrates the difference in the population density between 1990 and 2000 per county in United States America. The red color indicates the increase in the population density while the blue color shows the decrease in the population density over 10 years.
The values of the difference in the population density was classified into seven categories using the natural breaking method.
